

RigSight AI Run Report

Synthetic endurance validation

Rig: synthetic-rig-01

Summary

Metric	Value
Reading Count	180
Alert Count	67
High Alert Count	23
Unreviewed Count	67
Confirmed Count	0
Rules Count	45
MI Count	22

Threshold Profile

Threshold	Value
Temperature High C	82.0
Temperature Critical C	90.0
Temperature Drift C	3.0
Vibration High Mm S	4.0
Rpm Dropout	50.0
Torque Dropout Nm	5.0
Current High A	38.0
Voltage Low V	394.0

Top Alerts

Severity	Type	Recommendation
medium	voltage_drop	Review power supply stability and inspect current draw at the same timestamp
medium	current_anomaly	Check load demand, supply stability, and whether this aligns with temperature
medium	voltage_drop	Review power supply stability and inspect current draw at the same timestamp
medium	ml_anomaly	Compare this timestamp with nearby rule alerts and inspect the run phase l
medium	voltage_drop	Review power supply stability and inspect current draw at the same timestamp
medium	ml_anomaly	Compare this timestamp with nearby rule alerts and inspect the run phase l

RigSight AI 1.0 uses synthetic telemetry, synthetic alerts, and local-only review states. It does not include proprietary test data or private artifacts.
